

7-Day Programmable Radiator Thermostat

HR35 Rondostat

APPLICATION

The HR35 Rondostat are electronic radiator controllers. They allow the user to precisely control the room temperature during the course of a day to manage the heat requirements.

A modern design delivers features for both convenience and energy saving. It is used as a stand-alone controller for radiator heating control applications and is suitable for the following standard thermostat valves: Honeywell Home, Braukmann, MNG, Heimer, Danfoss.

SPECIAL FEATURES

- **Managed Temperature Control:** Set up a heating plan based on routine and heat your property when and to the level required
- **Reduce Energy Consumption:** ECO function reduces energy consumption and potential savings. Save up to 30 %
- **7 Day:** Time and temperature programming
- **Easy to install:** Installation is quick and easy without interfering with the heating system. No tools or specialist knowledge required
- **Modern and Simple Design:** Combines a modern shape with accurate control and fits perfectly into any living environment
- **Display content:** Is always visible and orientates to the left or right to suit the installation situation
